## About

Web & Landing Page Designer specializing in high-converting landing pages, sales funnels, advertorials, listicles, product pages, and offer pages for D2C and e-commerce brands. Proficient in Figma, Replo, Shopify, Next.js, and Tailwind CSS, applying CRO best practices, trust-building UX, and customer journey mapping. Strong background in competitor research, direct-response marketing, and paid media landing pages with mobile-first responsive design.

## Skills

**Design & UX:** Figma, Landing Page Design, Sales Funnel Design, Advertorials, Listicles, Product Pages, Offer Pages, Layout, Typography, Spacing, Visual Hierarchy, Mobile-First Responsive Design, Brand Guidelines

**E-commerce & CRO:** Replo, Shopify, Conversion Rate Optimization (CRO), Direct-Response Marketing, Paid Media Landing Pages, Performance Marketing, Customer Journey Mapping, Trust-Building UX, Competitor Research, D2C Funnel Design, A/B-testing

**Web / Frontend:** HTML, CSS3, JavaScript, React, Next.js, Tailwind CSS, Material UI, MERN Stack, Vite, Responsive Design

**Tools:** Figma, Replo, Shopify, Git, GitHub, Vercel, JIRA, Slack, n8n

## Work Experience

### Agentic AI Developer

*Naxtech, Remote (Feb 2026 – Present)*

- Conducted large-scale competitor research on websites, landing pages, and sales funnels to identify design trends, conversion strategies, and outbound campaign opportunities.
- Engineered a multi-tenant agentic AI platform with a dual-pass validation framework, automating research for 13,000+ entities at 95%+ factual accuracy.

### Associate Technical Lead

*Payback, Model Town, Lahore (March 2025 – Feb 2026)*

- Designed conversion-focused landing pages, offer pages, and checkout flows, applying CRO best practices, trust-building UX, and customer journey mapping to reduce friction and improve clarity.
- Led end-to-end design and build of payback.pk, a live cashback platform with offer pages, onboarding funnels, and mobile-first responsive layouts, while managing a team of 4–5 designers/interns.

### Website Designer & Front-End Developer

*Advanced Resources, Lahore (Oct 2024 – Sep 2025)*

- Designed high-converting landing pages, sales funnels, advertorials, listicles, product pages, and offer pages in Figma for D2C, e-commerce, SaaS, and service-based brands.
- Researched competitor websites, landing pages, and sales funnels to identify design trends, conversion strategies, and direct-response marketing techniques that improved user flow, clarity, trust, and conversion rates.
- Built and optimized landing pages and paid media funnels in Figma, Replo, Shopify, React, Next.js, and Tailwind CSS, applying CRO best practices (CTA placement, social proof, testimonials, trust badges, FAQs, friction reduction) while working independently to meet deadlines.
- Designed and shipped landing pages and websites for:
  - payback.pk — Cashback platform with offer pages, onboarding flows, and conversion-focused user experience.
  - clusterden.com — MERN-based CRM with lead-generation landing pages and sales funnel design.
  - greennsolar.com — Solar company website with service pages, trust-building sections, and lead capture forms.
  - dynastyfm.com — UAE petroleum trading website designed to establish credibility and trust.
  - 613 Guys — Canadian home care landing pages optimized for bookings and inquiries.
  - Meddo — US medical management platform with conversion-focused service pages.
  - DevPlob — Software house website showcasing services, case studies, and offer pages.
  - Comuni — Canadian event planning application with polished marketing and offer pages.

## Projects

**Slack-based Multi-Tenant AI Agent SaaS** — Deployed autonomous Claude-powered agents as Slack bots with MCP-based browser and SMS tools, paired with a real-time Next.js monitoring dashboard. Stack: Claude Agent SDK, MCP, Slack-Bolt, Next.js, Supabase.

**Agentic AI Outreach Pipeline** — Architected a Python and Gemini-driven outreach system for U.S. school district campaigns, featuring a 16-signal lead scoring model, automated Zoho CRM enrichment, and competitor/landing-page research feeding the targeting playbook.

**CCTV Bot Outlier Detection** — Built a real-time surveillance pipeline using YOLOv8 to detect accidents and trespassing, integrated with a Flutter mobile app for instant alerts and a FastAPI backend powering inference and event delivery.
